EDUCATIONAL WORKSHOPS
The Power Platform

Power Automate   Power Automate   Power BI   Power Virtual Agent

The Power Platform Education Workshop is a funded session developed for Executive teams who are working to quickly solve business pains through low-code no-code applications. Through this workshop, overview the Power Platform technology and learn about the line of business applications that are transforming the sector. See the tools in action and gain invaluable insights from our Solution Specialists.

Book an Educational Workshop to learn how to adapt and grow with the latest technology, future-proof operations and excel in customer experience over the months and years ahead.

SESSION OVERVIEW

- Explore how the Power Platform is more than just the sum of its parts but a full line of business applications.

- See Power Automate, Power Apps, Power Virtual Agents and Power BI in action and understand why the Power Platform is a game-changer in Financial Services.

- Understand the limitless integrations with tools like Teams, Microsoft 365, Dynamics 365, Azure and hundreds of other apps to build end to end FSI solutions.

- See use cases of connected sales, service resolution and acquisition journeys built with Power Platform upon the Microsoft Dataverse.

- Understand how to create connected workflows and 24/7 self-service Portals that mean your customers and agents can access unified, up-to-date information at any time.

- Learn how to connect knowledge bases, web content and customer data to empower Virtual Agents and bots to resolve low and medium touch queries, reducing pressure on front line agents.

- Explore how to harness the incredible up-to-the-minute power of Power BI and it's visual dashboards to make informed business decisions fast, across every area of operations.

If you would like to discuss how Redspire could help transform your organisation using the Power Platform, please provide your details via the link below to arrange your Power Platform Education Workshop.
